Cortana is a new personal assistant that's built into Windows 10. She can help you with a variety of tasks, such as setting reminders, playing music, and finding information on the web. Cortana is always learning, so she'll get better and better at helping you over time.

2. Microsoft Edge

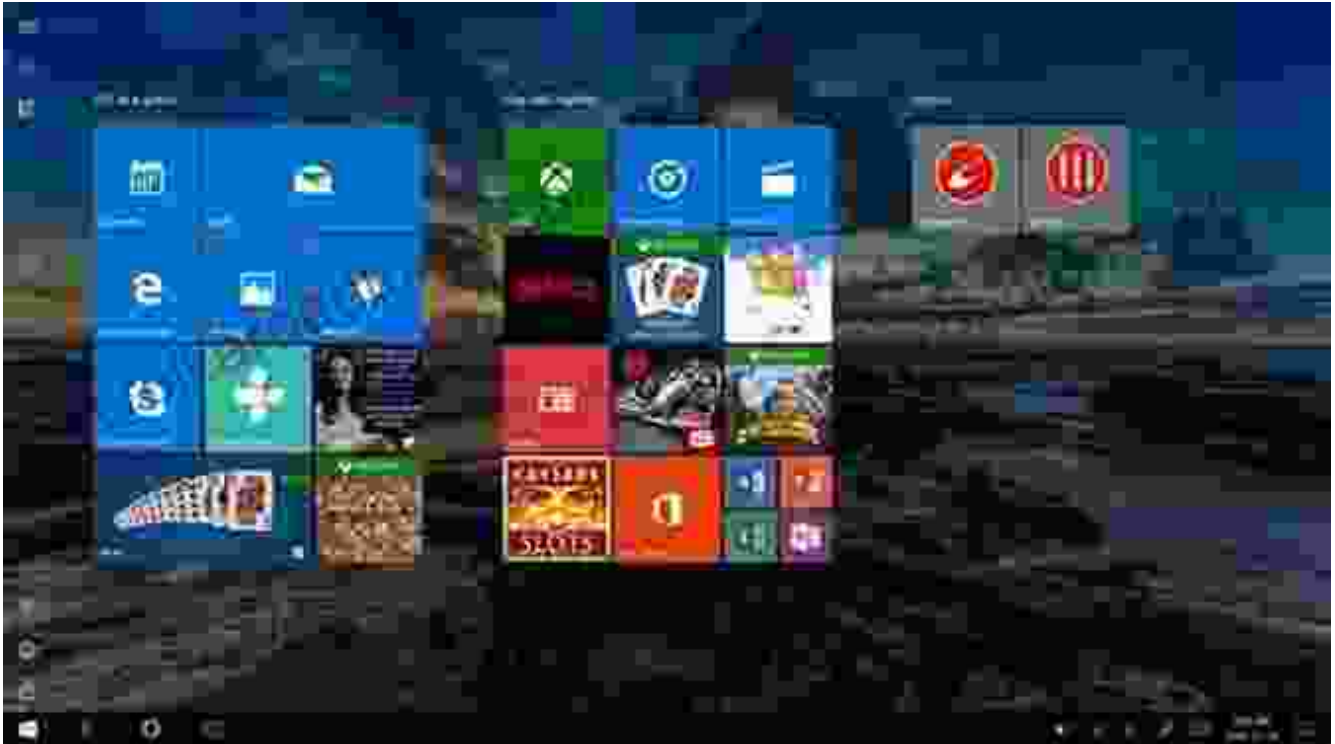

Microsoft Edge is a new web browser that's designed to be faster, more secure, and more efficient than Internet Explorer. Edge also includes a number of new features, such as the ability to write and draw on web pages, and to save web pages for offline reading.

3. The Action Center

The Action Center is a new central location for all of your notifications and settings. You can access the Action Center from the taskbar, and it provides quick and easy access to the things you need to do most.

4. Tablet mode

Windows 10 is designed to be used on both traditional PCs and tablets. When you switch to tablet mode, Windows 10 automatically adjusts its interface to make it easier to use on a touchscreen device.

5. Continuum

Continuum is a new feature that allows you to switch between tablet mode and desktop mode seamlessly. When you connect your tablet to a keyboard and mouse, Continuum automatically switches to desktop mode, giving you a full-fledged Windows experience. When you disconnect your tablet, Continuum automatically switches back to tablet mode.

These are just a few of the cool new things you can do in Windows 10. With its new features and updates, Windows 10 is the best Windows yet. If you're still using Windows 8.1, now is the time to upgrade to Windows 10.
