

Discover The Amazing Science Behind Your Body: Molecular Instructions Human Body

Your body is an amazing machine, and it is made up of trillions of cells. Each cell is controlled by a set of molecular instructions, which are stored

in your DNA. These instructions tell your cells how to grow, develop, and function.

Baby Biochemist: DNA: Discover the Amazing Science Behind Your Body's Molecular Instructions! (Human Body Books, Science Gifts, Medical Books for Kids) (Baby University) by Cara Florance

★★★★☆ 4.8 out of 5

Language : English

File size : 2410 KB

Screen Reader: Supported

Print length : 24 pages

In this book, you will learn about the different molecular instructions that make up your DNA. You will also learn about the different systems in your body, and how they work together to keep you alive.

This book is a fascinating and informative look at the human body, and it is perfect for anyone who wants to learn more about how we work.

Here are some of the things you will learn in this book:

- The structure of DNA
- The different types of molecular instructions
- How molecular instructions control your body's development and function
- The different systems in your body

- How the different systems in your body work together

If you are interested in learning more about the human body, then this book is for you. Free Download your copy today!
