Print length : 285 pages

Written by leading experts from a variety of disciplines, this book covers the latest scientific advances in environmental toxicology, ecotoxicology, risk assessment, and risk management. It also provides a detailed overview of the regulatory landscape governing the environmental safety of medicines.

This book is an essential resource for anyone involved in the pharmaceutical industry, including researchers, developers, manufacturers, and regulators. It is also a valuable reference for students and academics interested in the environmental safety of medicines.

Table of Contents

-
- Environmental Toxicology of Pharmaceuticals
- Ecotoxicology of Pharmaceuticals
- Risk Assessment of Pharmaceuticals
- Risk Management of Pharmaceuticals
- Regulatory Landscape for the Environmental Safety of Medicines
- Case Studies
- Future Directions

Key Features

- Comprehensive coverage of the environmental risks associated with the development and use of pharmaceuticals
- Practical solutions for mitigating these risks
- Written by leading experts from a variety of disciplines
- Detailed overview of the regulatory landscape governing the environmental safety of medicines
- Essential resource for anyone involved in the pharmaceutical industry

- Valuable reference for students and academics interested in the environmental safety of medicines
